PYMUG END OF YEAR REPORT 2020

PYTHON MAURITIUS USERGROUP

ABOUT MAURITIUS

Mauritius is a small island in the Indian Ocean. It was known as the Star and Key of the Indian Ocean. It still is the most significant independent nation of the Indian Ocean in terms of EEZ, foreign influences and African–wide achievements

With awesome beaches, it was among the top 10 countries to visit in 2018. It's also a prized honeymoon destination.

The Telegraph

First discovered by the Arabs, it was visited by the Portuguese, Dutch, French and British in order before gaining independence. The population comes from India, Africa, China and Europe, bestowing upon Mauriitus a rich culture, diverse heritage and bright potential. In government schools, English, French, Urdu, Hindi, Arabic, Telegu, Marati, Mandarin, Spanish etc are taught.

It's flag has always been the iconic red, blue, yellow, green. The color scheme is currently adopted by some folks

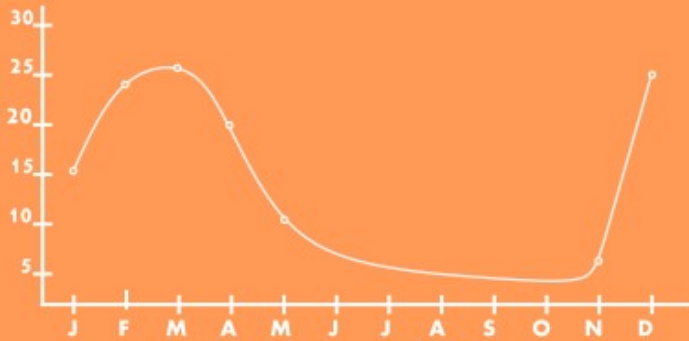

At one time a mauritian was holding one of the seven keys to the internet. Dodos come from Mauritius. The country is also home to the second oldest horse racing club in the world.

First edition of FlaskCon, global this year with awesome speakers and reviewers

Everybody contributed to make this the most inclusive Python event of this year

Two Pymug members also sat on the board of reviewers for an event which received submissions from Python fans at the Federal Electoral Comission and Google.

Both members have 10+ years of experience in Python and have worked on amazing projects!
